Recall and off lead exercise

Complete e-learning

I know my name.

Working on it Proficient

I know the recall cue and I will come to you in the house and garden when utilised at least 90% of the time.

Working on it Proficient

I reliably return to you in response to recall cue when off lead in an area with few distractions.

Working on it Proficient

I have demonstrated the ability to consistently recall at a safe speed, making contact with a hand touch out to the side of the handler and without jumping up. I may require encouragement in higher distraction areas. I will remain with handler until released. I will recall away from other dogs in most situations, with reinforcement.

Working on it Proficient

Handling, grooming and equipment

Complete e-learning

I am happy to be gently lifted, carried and touched all over my body. I am being introduced to equipment without backing away.

Working on it Proficient

I am happy for you to check my eyes, ears and feet. I enjoy short grooming sessions with a brush. I have visited the vets.

Working on it Proficient

I am happy for a full body check including by the vet. I remain comfortable standing for grooming sessions up to 10 minutes and being towel dried.

Working on it Proficient

I am comfortable entering and having a full body check at the vets. I remain still and comfortable being groomed. I am comfortable wearing Guide Dogs equipment.

Being out and about

Complete e-learning

I am relaxed interacting with any other animals that live in my home. I have experienced a range of sights and sounds at home.

Working on it Proficient

I happily interact with any other animals at home. I can move away from distractions with help from my handler. I am comfortable around loud noises.

Working on it Proficient

I politely interact with other dogs when on and off lead and can be lured away from interactions. I can pass people and animals with encouragement from my handler.

Working on it Proficient

I can walk past food, people (including joggers), bikes, dogs or other animals, while on a lead, without avoiding or lunging in most situations. I politely interact with other dogs when on lead when given the opportunity and will move away when asked. I am comfortable in lots of different places and with sights and sounds of daily life.

Working on it Proficient

Social behaviours and settling on a lead

Complete e-learning

I have a routine and I am comfortable settling overnight. I am building my confidence being on my own for short periods in the day with items that help me do so. I am being introduced to tools to help me settle.

Working on it Proficient

I am learning how to settle on lead in appropriate environments. I continue to be comfortable settling overnight on my own. I can entertain myself whilst my handler completes daily tasks. I can be left for short periods in the daytime.

Working on it Proficient

I am practising self settling quietly for longer periods in more places with less help. I am being left for longer periods of time regularly on my own at home with less restrictions without getting into mischief.

Working on it Proficient

I am comfortable settling quietly in familiar social situations with minimal input. I am calm and self-controlled around food, only chewing and playing with items I've been given, and not jumping up or stealing items. I have demonstrated I am able to be left alone, for periods of 1 to 3 hours without the need for a closed crate.

Working on it Proficient

Useful definitions

Here are some common terms and cues used throughout the puppy raising modules.

Comfortable

Body language: Loose body and face that is normal for your puppy. Could include a softly wagging tail. Puppy is presenting as content and secure. Will engage in activities.

Uncomfortable

Tightness in face and body not in movement away, panting, mouthing, yawning, shaking, vocalising. Not able to engage with task.

[Read the body language supporting document](#)

Rewards

A reward is something that's given to your puppy that they perceive as something nice. These can include vocal praise, physical touch, food reward, play with toys, interaction with the environment such as sniffing or access to play with other dogs. What your puppy finds rewarding will be individual to them and can vary or change.

Some things could include:

- Vocal praise.
- Physical praise, such as a gentle tickle under the chin.
- Food reward.
- Play with toys – you may reserve a favourite toy to use as reward when practising a particular behaviour.

Cue list

Behaviour	Cue
Focus and name response	Their name
Recall	Their name plus come/whistle/closed hand held out
Positional cues	Sit, stand, down
Hand touch	Touch and hand target
Release cue	Okay
Tug toy games	Okay to cue they can interact with the toy and drop to cue letting go of the toy
Toileting associations	Busy busy
Whistle association	3 pips of the whistle
Encouraging your puppy to sniff	Go sniff
Encouraging movement with you	Let's go
Head in or out of equipment	In or out
